

XRY / Kiosk v7.7.1 – Micro Release Notes

- 107 new app versions supported
- 81 new device profiles added in this release

Apple iOS

- Announcing XRY compatibility for GrayKey extractions
- We have enabled importing Keychain data from either a folder import or an unencrypted iTunes Backup into XRY
- XRY will include the decoded secret data from the keychain, even when imported data via folder importer
- Improved support for Apple Locations – we are now able to support location data decoding from the Apple iOS Consolidated database

Importing GrayKey acquired Apple iOS data into XRY

The data acquired from GrayKey includes an iTunes backup, a file system dump, a memory process dump and a decrypted Keychain. The Keychain data is placed inside an Apple Property List file, while the rest of the data is zipped. Importing the acquired data into XRY can be done in two different ways:

- 1. Select the device profile "Apple iOS iTunes Backup". As format, select "Folder". As import directory, select the directory where the unzipped file system dump is located.**
- 2. Select the device profile "Apple iOS iTunes Backup". As format, select "IOS". As import directory, select the directory where the unzipped iTunes backup is located.**

Important: In order to include the decrypted Keychain into the Apple iOS decoded data, place the Keychain Property List file as "Keychain.plist" in the root of the import directory. It will then be automatically included during import.

After having imported and decoded data from a file system dump, please be sure to review the Locations / History category view. The consolidated location database is recovered as part of the file system dump and XRY v7.7.1 includes support for decoding this data.

Improvements

- WhatsApp: decoding improvements for video and picture attachments
- Improved decoding support for Galaxy S7 Edge

Cloud

- Google Takeouts: YouTube video now extracted

End of Life for XRY Reader

MSAB will end of life the XRY Reader v6 application on 31 December 2018. We are letting users know of our plans, in order to allow time for adjustment. After this date, no future versions of XRY Reader will be made available and support will not be guaranteed. Please download the new XAMN Viewer application for free, which is the replacement software tool for XRY Reader: www.msab.com/products/xamn
